

PLAN: Charlestown

Climate Resilience & Open Space

December 16, 2020

Boston Planning &
Development Agency

Welcome

Technology & Tips

Jason Ruggiero, Community Engagement Manager

**boston planning &
development agency**

Meeting Recording

At the request of community members, this event will be recorded posted on the PLAN: Charlestown project webpage at **<http://bostonplans.org/PlanCharlestown>** for those who are unable to attend the Zoom event live.

Also, it is possible that participants may be recording the meeting with their phone cameras or other devices. If you do not wish to be recorded during the meeting, please turn off your microphone and camera.

If your camera and microphone are off, you can still participate through the text chat feature.

Agenda: Open Space & Climate Resilience

- Open Space in Charlestown
 - Park properties and park planning (*Boston Parks and Recreation Department*)
 - Online Activity: On our website after this event
- Climate Resilience in Charlestown
 - Climate Ready Charlestown (*Climate Ready Boston, Environment Department*)
 - Question and Answer
- If you have a follow up item, please reach out to Jason Ruggiero (Jason.Ruggiero@boston.gov) and we will be in touch as soon as possible.

Meeting Format

- Presentation followed by Q & A and comments.
- During the presentation, all microphones will be muted.
- Once the presentation is over, we will take questions and comments in two ways:

Through the **Q&A tab** at the bottom of your screen; or

You can **raise your hand** and we will take your questions in the order that hands were raised.

Zoom Tips

Welcome! Here are some tips on using Zoom for first-time users.

Your controls should be available at the bottom of the screen.

Clicking on these symbols activates different features:

Mute/unmute (you will remain muted until a host gives you access)

Q&A to ask questions throughout the presentation

Turn video on/off (your video will remain off until a host gives you access)

Raise hand to ask for audio/video permission at the end of presentation

Slido

Slido is an interactive polling feature that will allow for real time feedback

1. Go to **slido.com**
2. Type **8302** where it says

COVID-19 Resources

Stay up-to-date with COVID-19 related announcements, City of Boston reopening plans, and resources for you and your community at:

boston.gov/coronavirus

Content available in 16 languages.

The screenshot shows the City of Boston's official website for COVID-19 resources. The header includes the City of Boston logo, Mayor Martin J. Walsh's name, and the official seal. Navigation links for 'PAY AND APPLY' and 'PUBLIC NOTICES' are in the top right. The main heading is 'CORONAVIRUS DISEASE (COVID-19) IN BOSTON'. Below this, a paragraph states: 'The state has updated guidance on the [Reopening Massachusetts website](#). We also continue to update City-specific guidance for Boston on [our reopening website](#).' The date 'July 12, 2020' is shown. A 'PUBLISHED BY: PUBLIC HEALTH COMMISSION' badge is present. A 'MULTILINGUAL CONTENT' section lists 16 languages: العربية (Arabic), Kriolu (Cabo Verdean creole), 中文 (Chinese), Français (French), Kreyòl ayisyen (Haitian Creole), Português (Portuguese), and Русский (Russian). At the bottom, it reports '13,673 CASES | 9,683 RECOVERED' as of Friday, July 10.

What is Imagine Boston 2030?

Begun in 2015 and completed in 2017, Imagine Boston 2030 (IB2030) is the first citywide plan in 50 years.

It created the guiding principles and framework to guide all growth in the City of Boston. In partnership with the BPDA, the City of Boston can ensure that priorities are carried out through creative and thoughtful land use regulations and guiding principles.

Tell us what you primarily use the existing open spaces in Charlestown for?

 Start presenting to display the poll results on this slide.

slido

What should open spaces in Charlestown accommodate?

 Start presenting to display the poll results on this slide.

Online Activity

- Take a photo of your favorite open space in Charlestown. Say what makes this particular open space great, and submit it on the project website!
- Entries will be accepted until January 15th.

Climate Resilience

Peyton Siler Jones: Climate Resilience Program Coordinator, Environment Department

CLIMATE READY BOSTON

**EXTREME
TEMPERATURES**

HEAT

**EXTREME
PRECIPITATION**

**STORMWATER
FLOODING**

SEA LEVEL RISE

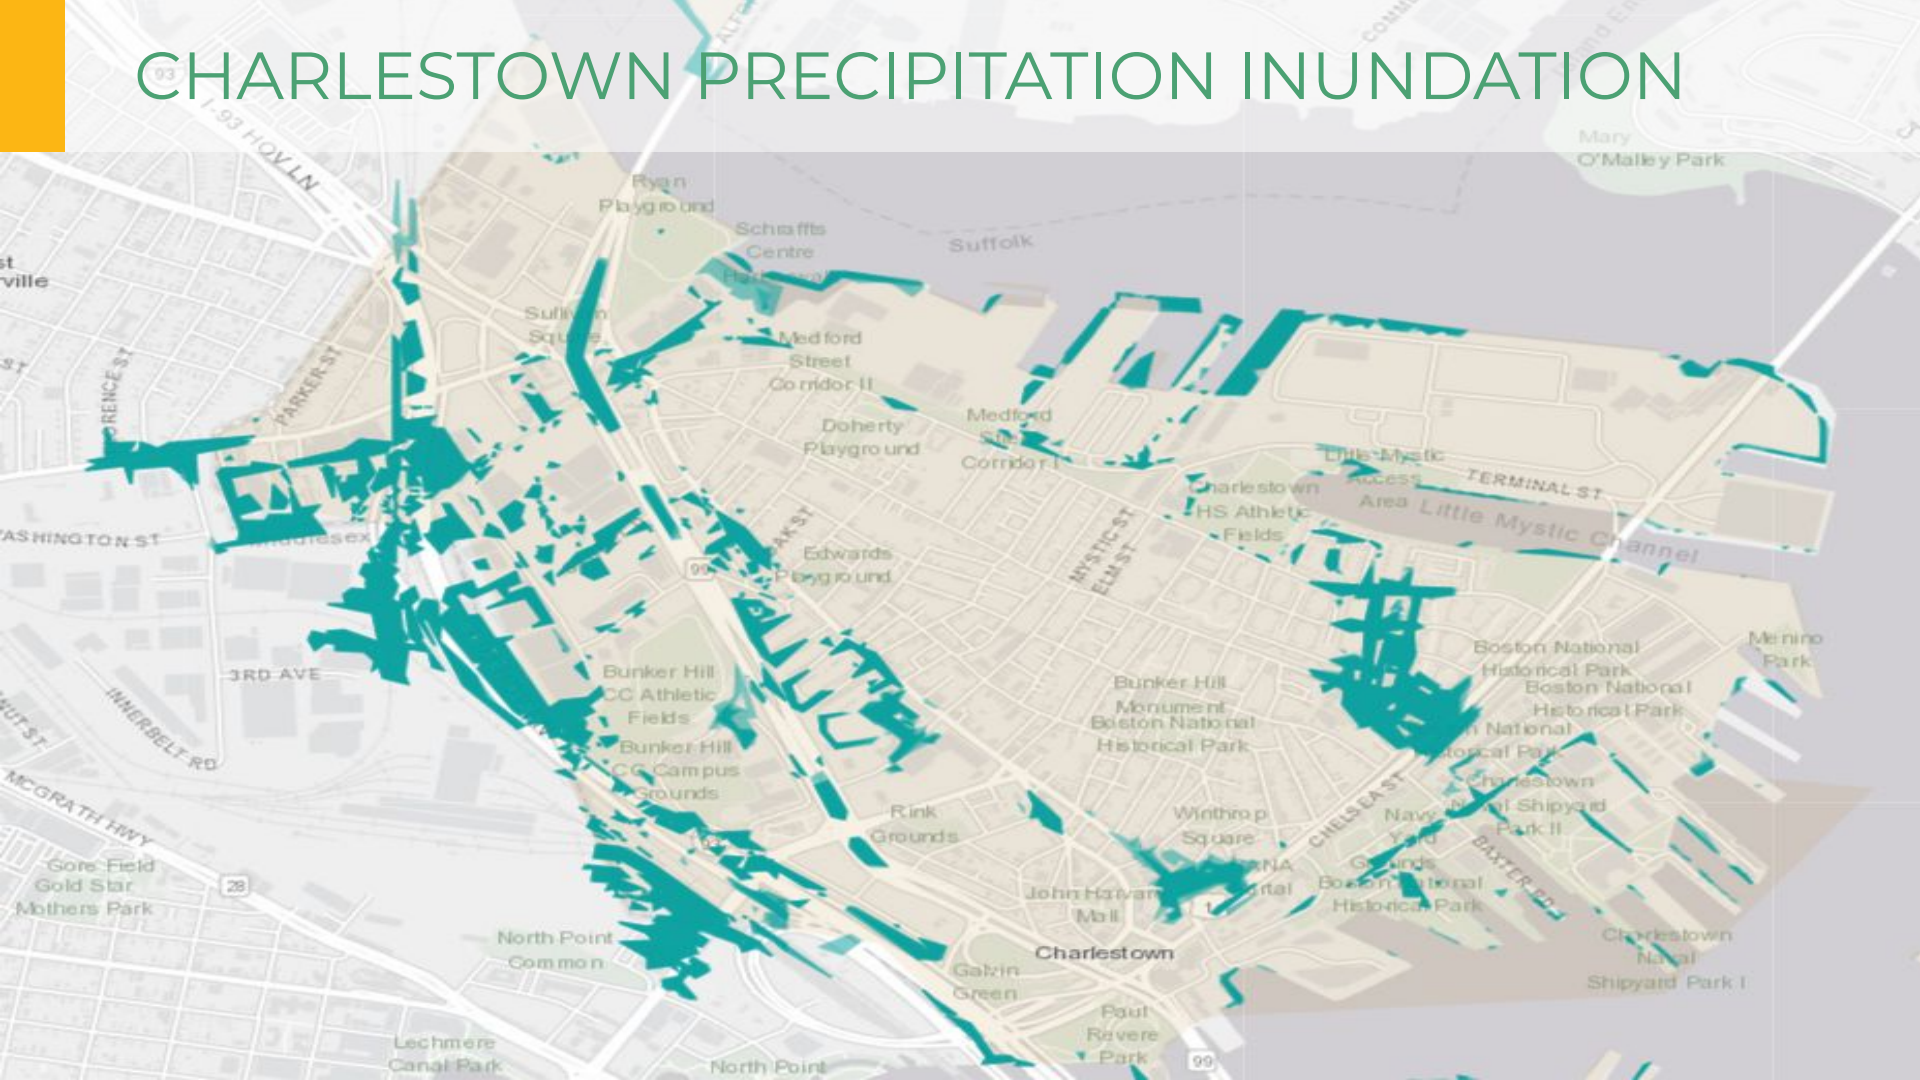

**COASTAL & RIVERINE
FLOODING**

**COASTAL
STORMS**

CHARLESTOWN PRECIPITATION INUNDATION

ADAPTING TO CLIMATE CHANGE

PROTECTED SHORES

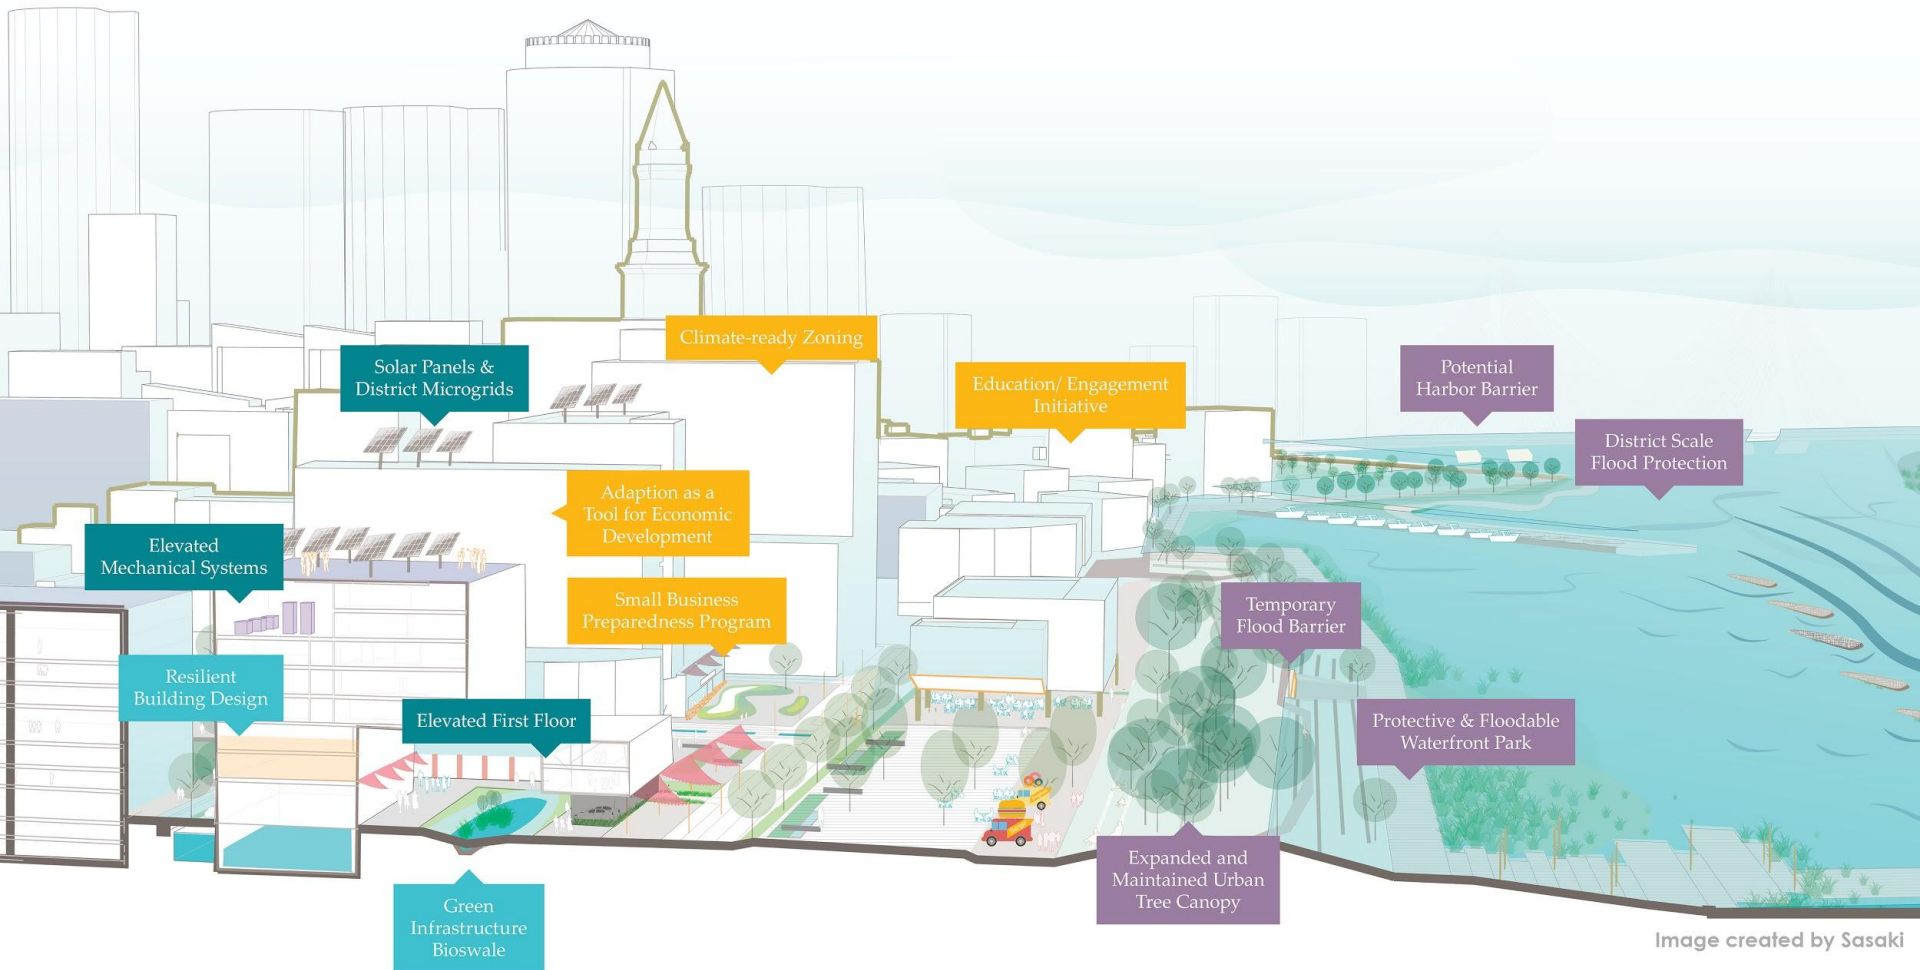

PREPARED AND CONNECTED COMMUNITIES

RESILIENT INFRASTRUCTURE

ADAPTED BUILDINGS

NEIGHBORHOOD PLANNING

Climate Ready Downtown and North End

We have started the planning process to protect the Downtown area from coastal flooding.

Climate Ready East Boston

Our first neighborhood coastal resilience plan. Read the report.

Climate Ready Charlestown

We are finding ways to reduce flood risk while improving the community.

Climate Ready South Boston

Read the report on coastal resilience strategies across the neighborhood.

Moakley Park Vision Plan

We're working with the Parks Department on a redesigned, resilient Moakley.

Climate Ready Dorchester

Launching Fall 2019 to design solutions for coastal flood risk that address connectivity, accessibility, and equity.

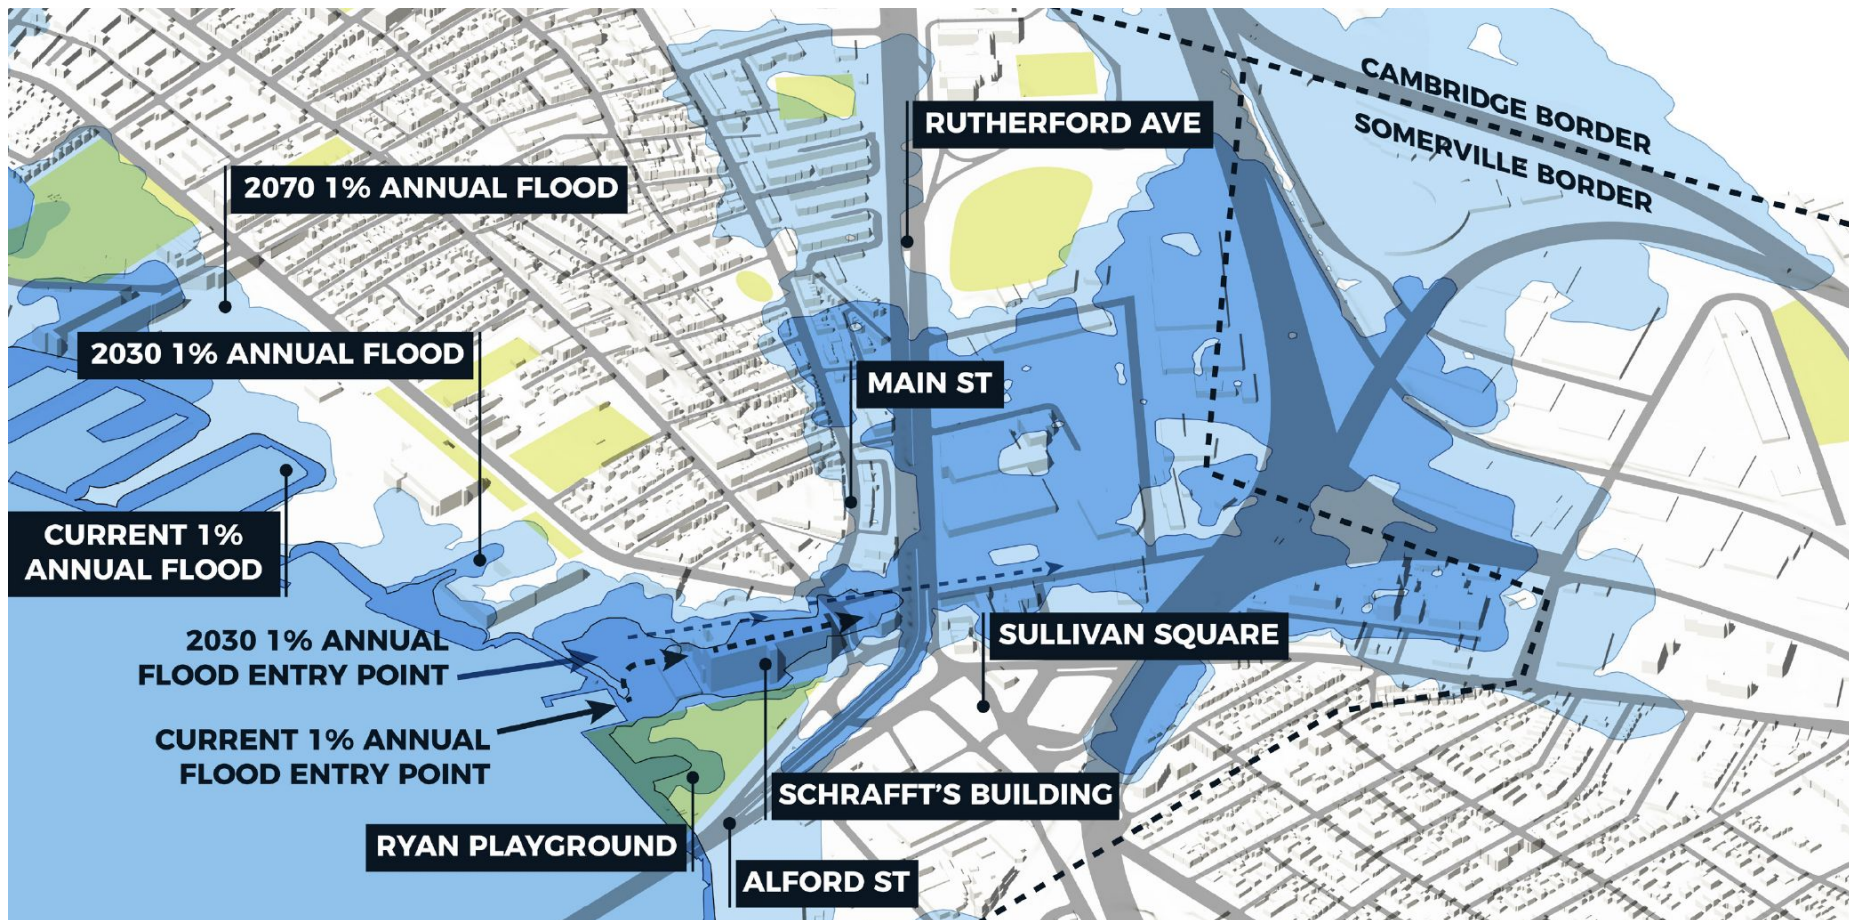

RESILIENT BOSTON HARBOR

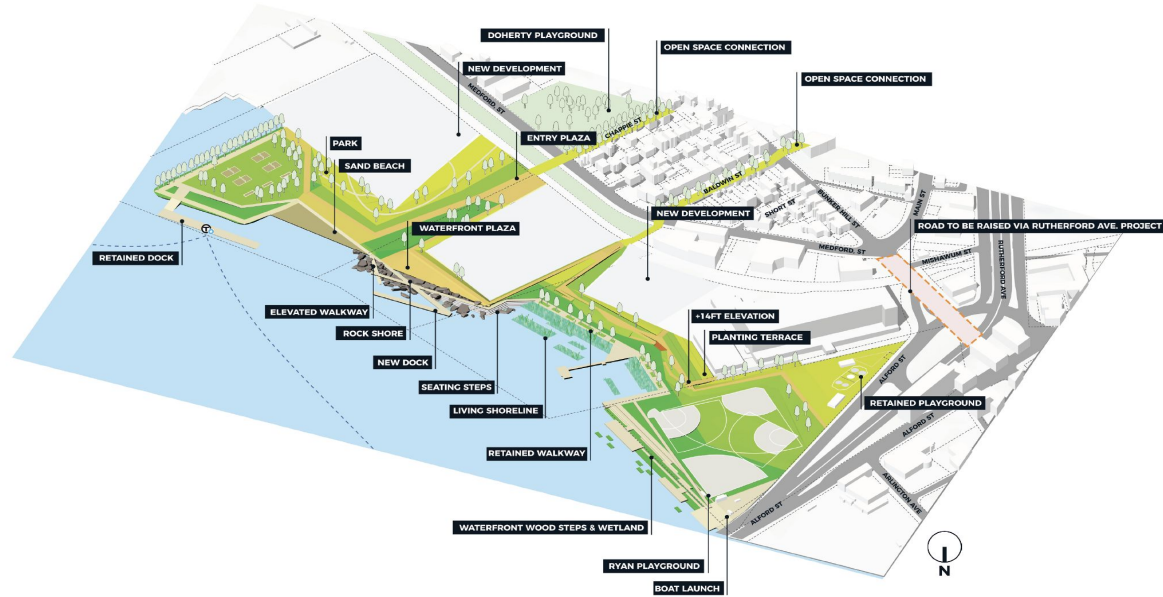

CHARLESTOWN PHASE I

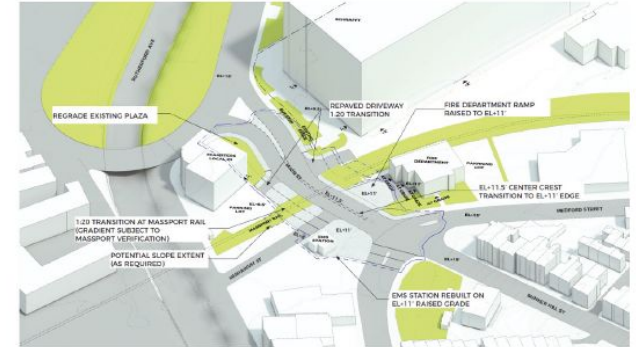

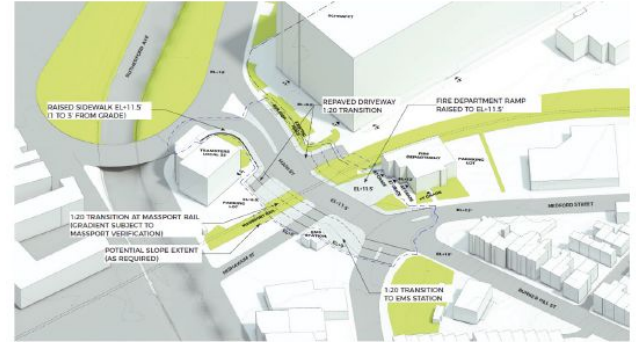

IN CHARLESTOWN PHASE I, THE CITY LOOKED AT ONE MAJOR FLOOD PATHWAY.

MAIN ST & SCHRAFFT'S CENTER ARE THE CORE OF PHASE 1.

The Sullivan Square waterfront is anchored by new open space and flood protection systems across three Schrafft's Center properties in the long-term climate resilient strategy.

RYAN PLAYGROUND IS LOW LYING WATERFRONT PROPERTY.

CHARLESTOWN PHASE II

COASTAL RESILIENCE SOLUTIONS FOR CHARLESTOWN PHASE TWO

I. Flood modeling

A. *Timing and location of flooding*

II. Stakeholder engagement and outreach

A. *Community Advisory Board*

B. *Open housing*

C. *Focus groups*

D. *Survey*

III. Coastal resilience design options

HEAT RESILIENCE

☐ Heat Resilience Planning Project

- ☐ Boston Parks Department: Urban Forestry Plan
- ☐ Boston Public Health Commission
 - ☐ *Extreme Temperature Response Plan*
 - ☐ *Extreme Temperature Communications & Outreach*
 - ☐ *Neighborhood Emergency Preparedness Plans*
- ☐ Museum of Science Heat Mapping Data
- ☐ Covid & Heat AC Pilot Program

STORMWATER FLOODING MITIGATION

- ❑ Partnership with Boston Water and Sewer Commission
 - ❑ *Stormwater Modelling*
 - ❑ *Stormwater Retention Planning*
 - ❑ *Outfall Protection*
 - ❑ *Stormwater Fee*
 - ❑ *Coastal Resilience Discharge Analysis*
- ❑ Smart Utilities Policy

2019 Stormwater Management Report

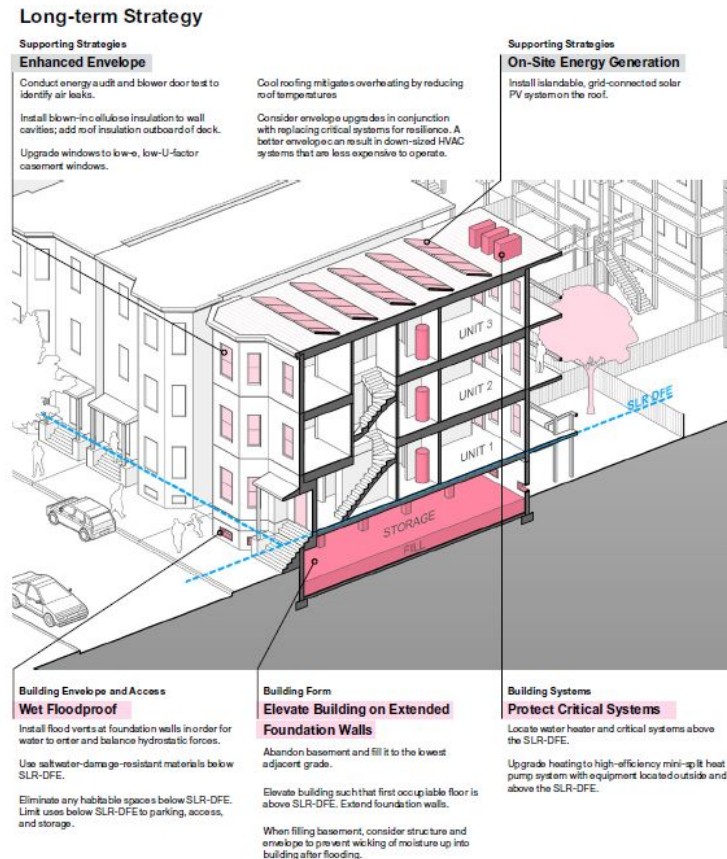

Boston Water & Sewer Commission

COASTAL RESILIENCE DESIGN GUIDELINES & ZONING

COASTAL RESILIENCE DESIGN GUIDELINES

- ❑ Provide specific design direction on implementing resilience measures for new construction and retrofits
- ❑ Illustrate flood protection measures in Boston context
- ❑ Guide development in Zoning Overlay

COASTAL FLOOD RESILIENCE ZONING OVERLAY DISTRICT

- ❑ Protect against risks to life safety and property damage, and conserve the value of land and buildings
- ❑ Overlay District: 1% chance storm event with 40-inches of sea-level-rise
- ❑ Specific zoning definitions, building dimensional and use provisions to facilitate resilient design measures

HOW TO GET INVOLVED?

I. **Contribute to planning**

- Heat Resilience
- CRB Charlestown Phase II

II. **Build social resilience in your community**

- Educate yourself, your friends, and family on climate change (Greenovate Leaders)
- Create a BPHC Emergency Kit

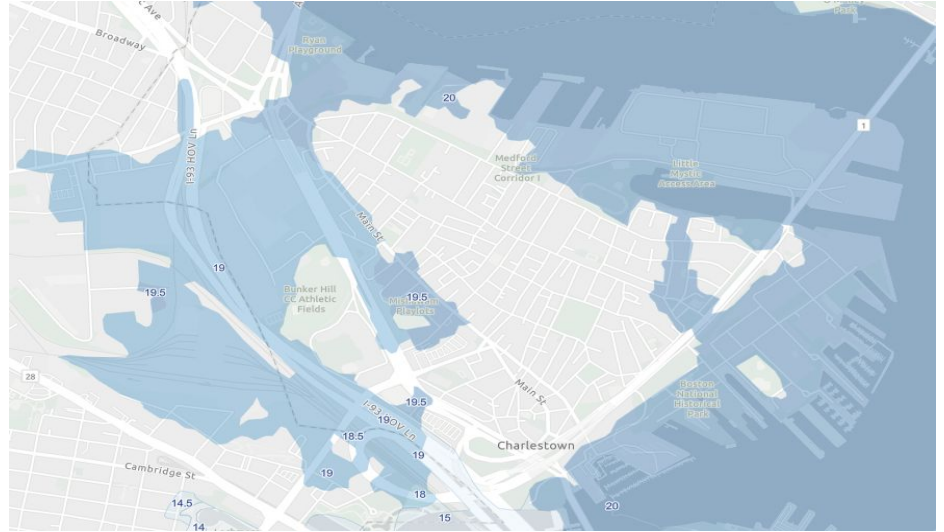

THANK YOU!

Bunker Hill Housing

- **Key takeaways from tree assessment:**

- 340 trees identified, 82 of which are recommended for removal = 258 remaining
- 109 are in good condition, 133 are in fair condition = 242 trees
- 60% of the existing trees on site are 15" or less DBH (diameter)
- 93 good and fair condition trees have good location values and are 16" DBH or larger
- Trees are evenly dispersed around the site, making it infeasible to plan development around the trees.

Bunker Hill Housing

Bunker Hill Housing

- **Tree preservation approach:**

- Open space has been modified to preserve as many trees as possible
- 81 trees identified across the site that are potentially preservable
- Trees that are in good condition, have good location values and are at least 16" DBH will be closely evaluated for opportunities to accommodate their preservation within building sites
- Approximately 500 trees will be planted over the course of the project; after 15-20 years, the total DBH on site will be over 2.25 times the total DBH that currently exists on site in trees that are in good or fair condition.

Bunker Hill Housing

PROPOSED TREES: 500+ TREES (1500 DBH AT TIME OF PLANTING 7500 BY YEAR 20)

Bunker Hill Housing

Bunker Hill Housing

 **PROPOSED TREES: 75 (225 DBH)**

Bunker Hill Housing

Bunker Hill Housing

- Carbon reductions: maximize building efficiency
 - Full build carbon savings vs current buildings: 3,800 tons annually
 - (for context: current tree canopy carbon reduction: 3.7 tons annually)
- Path to net zero carbon: maximize cleaner electricity
 - Electric heating and cooling systems
 - Solar + Storage ready

Bunker Hill Housing

- **Superior** indoor air quality

- Continuous fresh air supply to every bedroom
- Energy recovery of ventilation air pre-heats/cool
- MERV 13+ filtration (comparable to hospitals) of fresh air controls:
 - Pollen
 - Auto fumes
 - Mold/spores
 - Dust mites
 - Etc.
